SUMMARY

Full-stack developer skilled in the MERN stack (MongoDB, Express.js, React.js, Node.js) and Java, with hands-on experience building REST APIs, authentication systems, and real-time applications. Proficient in Data Structures & Algorithms, OOP, and database design (SQL, MongoDB), with 4+ deployed full-stack projects and internship exposure to Java development.

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL

Frameworks / Libraries: Node.js, Express.js, React.js

Databases: MongoDB, MySQL

Tools & Technologies: Git, GitHub, Postman, VS Code, Socket.io

Core Concepts: DBMS, OOP, Data Structures & Algorithms (DSA), REST APIs, Real-Time Systems

WORK EXPERIENCE

Java Development Intern — CodeTech (Remote)

Dec 2025 – Jan 2026

- Strengthened core Java fundamentals (OOP, collections, exception handling) through hands-on assigned tasks and coding exercises.
- Completed 10+ small development tasks under guidance, gaining exposure to real-world coding practices and debugging workflows.
- Collaborated remotely with a development team, building familiarity with Git-based version control and structured task delivery.

PROJECTS

AI-Powered LMS (EdemyLMS) — Personal Project

Stack: MERN, Clerk, Stripe, REST APIs

[Project Link](#)

- Engineered an AI-powered LMS spanning 5+ course categories, streamlining content delivery and student engagement.
- Built educator-driven video content delivery with course management and enrollment workflows.
- Architected the backend for performance-optimized content access, improving average page load speed and scalability.

AI Toolkit (SaaS) — Personal Project

Stack: MERN, OpenAI API

[Project Link](#)

- Integrated 6+ AI models to deliver real-time text, code, image, and conversational assistance within a single application.
- Configured secure JWT-based authentication and structured RESTful APIs using Node.js and Express.
- Consolidated 6+ AI-powered tools into one platform, reducing the need to switch between multiple applications.

QuickChat — Personal Project

Stack: MERN, Socket.io, JWT

[Project Link](#)

- Developed a scalable real-time chat system supporting instant messaging for 50+ concurrent users with secure authentication.
- Streamlined backend workflows for reliable message and media delivery.
- Implemented 4+ security features including JWT authentication, protected routes, password encryption, and secure sessions.

Wanderlust — Personal Project

Stack: MERN, Cloudinary

[Project Link](#)

- Created an Airbnb-inspired rental platform with JWT authentication and end-to-end booking workflows.
- Established backend support for Cloudinary-based image handling, search/filter functionality, and user reviews.
- Enhanced data operations for improved performance, reducing average query response time.

EDUCATION

Bachelor of Engineering in Computer Science — Savitribai Phule Pune University, Pune 2022 – 2026

CGPA: 7.20 / 10
